

Ashton Bentley is Selected by Vidyo for Exhibition Stand at Gitex Technology Week

From October 20 through 24th, Vidyo will demonstrate its VidyoRoom™ HD220 system, using the Ashton Bentley Connect 2 Dual Screen integrated audiovisual environment at the Gitex Technology Week in Dubai, Stand ZL-B4 in Zabeel Hall.

The Connect 2 supplies everything required to provide a complete audio/visual environment for videoconferencing and presentations. In addition to the 55" displays, the system includes: audio; control system with intuitive user interface; all cables/connectors/brackets and IP tools for remote management. All components can be assembled in minutes with no tools.

"As this demonstration will illustrate, Ashton Bentley's state of the art display units and our award-winning suite of products that deliver the highest video quality over any network, are the perfect combination for offering a truly amazing video conferencing experience to our customers," said Fabio Tessera, VP Sales, Southern Europe, Middle-East, Africa and Russia for Vidyo.

According to Tony Leedham, Director of Business Development for Ashton Bentley, "Having worked with Vidyo at their London office, providing dual screen and single screen room displays in their showroom, we are very pleased to now provide an audio/visual environment for their demonstration at Gitex. Our system helps optimise the Vidyo experience, enabling exceptional picture and sound quality."
