

# What do you get with an Ashton Bentley system?

- **Everything required in one pre-configured, out of the box package to facilitate excellent Meetings, Presentations and simplify Videoconferencing.**
- **Remove the need for complex integration**
- **Walk in and Work**

## The Basics

- Complete modular systems “out of the box”
- Replaces multi-vendor integration
- Quick to deploy - no skill, experience or tools required
- Flexible, expandable and customisable
- Simple to manage and support
- Standard platform for global deployment
- Empowers all users to utilise Videoconferencing

## Technology

- Edge lit LED full HD Deep Colour display
- Accommodates most video conference platforms such as Cisco, Microsoft Lync, Panasonic, Polycom, Radvision and Vidyo. More hardware and software systems being added to the list all the time
- Display graphics optimised for each codec model
- Independent Presentation and Videoconference modes
- Studio quality active audio
- Ergonomic tool-free design

## Unique User Interface

- Table top - surface or flush mount
- Dual PC Input/Switcher
- Microphone
- Simple push button user interface with feedback
- Semi-automatic operation
- Single cable connection back to Chassis

## Remote Control & Monitoring

- On Screen Display providing useful system status and faults
- Remote IP Tools for Real Time Monitoring
- IP Fault Reporting and Diagnostics
- Simple protocols for integration with third-party control and monitoring systems

## Lowest Total Cost of Ownership

- Complete system package, no additional costs
- Set to work in minutes. No specialist skills, tools or building works
- Automated power management
- IP Tools reduces cost of management
- Four common active components to each system, makes support and maintenance simple

## Green Credentials

- Light and easy to transport
- Integrated package – No additional resources
- 1/10 of the power consumption of traditional similar systems
- Lowest possible whole of life carbon footprint
- Reduced management resources
- Simple to extend, re-deploy and re-use
- 95% recyclable materials

## Applications

- Executive offices
- Corporate meeting rooms
- Boardrooms
- Presentation suites
- Training
- Education
- Medical
- Opportunities with release of new products in 2013
