ab rt10 Rectangular Table for 10

ASHTON BENTLEY
Collaboration Spaces

Overview

Technology enabled tables that integrate seamlessly with the Ashton Bentley range of display systems.

This combination provides a very easy to use complete collaboration space that is simple to deploy in any room, and very intuitive to use.

Removing the frustration often found with tables covered in cables and other technology.

Shaped table with Single 65" display. Showing integrated table box and cable grommet

Key Features

- Simple and quick to assemble
- Reduce surface clutter with concealed power and connectivity
- Under table connectivity hub (*interface*) for laptops, microphones, network (with POE) and USB. Easily add VoIP phones or Touch Panels with no additional cables
- Cable retractors for laptop inputs. Concealed when not in use
- Choice of laptop connectivity and simple button selection
- Cable management with discreet surface grommets for phones, touch panels and microphones
- Only one CAT6A cable to connect table to the display

Optimised for Video

The Ashton Bentley range of 'shaped' tables have been designed to make sure most people are on camera for video calls. Plus able to view the displays and still engage with others across the table.

Table Options

Cable Access

Small rectangular table box with hinged lid to allow cables (such as laptop and mobile power) to be neatly passed through the table surface to the sockets in the table legs. Reduce table clutter.

Chairs

An optional range of chairs and stools in various colours are available, manufactured by Sedus from Germany. Height options:
- Standard
- High Stool

Custom Finish Options

Our standard colour is black/white
We can supply custom:
- Leg colours
- Table surface finish
