**CONTACT:** Tony Leedham – [Tony.Leedham@ashtonbentley.com](mailto:Tony.Leedham@ashtonbentley.com) - +44 7747 606352

---

### AB Configurator Design your AV Room System & Furniture in a few minutes!

Why should it be so difficult to design your meeting room? Consultants, Specifiers, Systems Integrators, Builders, Facilities all suck the life out of the process.

Probably taking weeks, if not months, to deliver and most likely not actually giving you the result you had hoped for. Oh, and yes probably expensive, with complex user manual and lengthy SLA for support.

Sound familiar??

It shouldn't be this way. So, as part of growing array of tools designed to make specifying and designing a meeting space simple, Ashton Bentley launch their online Space Configurator.

This new tool is hosted on our website and is available to anyone and allows users to quickly select Ashton Bentley components and configure a system, tailoring it to their individual requirements as they go.

Systems with all the AV equipment required (yes everything to equip a meeting space) along with matched technology enabled tables.

The configurator will also provide a technical overview of what's been specified, along with images, and a price.

Once the specification is complete, the option to save various designs is available and allows for quick and easy ordering as well as being able to discuss your systems directly with the team at Ashton Bentley.

This really does change the game.

**END**

[www.ashtonbentley.com](http://www.ashtonbentley.com)

Ashton Bentley manufactures a range of complete 'out of the box' collaboration space solutions that provide professional audio-visual systems seamlessly integrated with technology enabled tables.

Reduce the time taken to specify, purchase and install, so significantly reducing the total cost of ownership.

If required integrate a VC platform and the system becomes a truly versatile communication and collaboration space. VC platforms include Cisco, Dolby, Google Meet, Logitech, Poly, Teams, StarLeaf, Yealink and Zoom.

Collaboration technology that just works and isn't complicated to use.
